## Answers to Questions

1. No, lifelong democrat.
2. Yes, I am a member of the 45<sup>th</sup> district. Yes both my wife and I have donated to the county and state party. I have never been a PCO.
3. **Putting Duvall First.** My plan is simple, I got into the race because my opponent was running un-opposed and I felt he would do more harm than good to the city of Duvall. My plan of attack is to get my message out by door belling and by direct mail pieces. By the first candidate forum, I plan to have 200 houses door belled. I currently have raised 500 dollars and have received some republican backing from some long time residents of the city.
4. Growth, Fiscal Management and traffic safety. While growth is going to happen we need to actively ensure that we have the infrastructure to support that growth.  
We need to ensure that the city continues to have a reserve and we need to continue to fund that reserve account.  
Duvall has a state highway that is also called Main Street, the next Mayor needs to address some large safety concerns around speed and pedestrian safety on Main street. If I am elected, I will work very hard to ensure that we deliver on all three of those items.
5. I am running in a non-partisan race with one challenger so we will not have a primary runoff we will go straight to the general election.
6. No I do not believe that the current structure is fair. I believe that our system currently relies too much on the consumer but I also have to admit that I do not completely understand all of the different tax's that we as a state level on the consumers.
7. The Davis-Bacon act is an act that requires any construction project over 2,000 dollars that the federal government is involved in, requires that all construction personnel be paid at least the local minimum wage. I am not sure why everyone would not support this act, I certainly do.
8. Our customers (voters) demand that we are responsive to their desires and what they want us to do. This seems like a very ill advised attempt to change the King county council and executive office to a non-partisan office. While we may not always agree with those representatives, I believe that the voters should have the opportunity to choose their representative and that must include all of the willing candidates that wish to run for those offices.
9. Not sure, if I understand the difference.
10. That is a very hard question to answer, as I don't have all of the information for this issue. However, one of the issues that comes up in this discussions is the cost of prescription drugs, and personally I pay way to much for my medication. I think that the government tries to control this process too much and tries to limit the competition that the pharmaceutical companies have to deal with. I believe that if consumers had the ability to purchase medicines from other countries and through that process were able to save lots of money. Some of our citizens would not have to choose between food and medicine.
11. Through my teen age years, I was raised by my gay uncle and his partner. I have never felt uncomfortable with the gay community and I feel that any gay or trans gender person must have the same rights as any other person. There also should be no discrimination based on sexual preference. None.

12. I think that communities need to do more to understand what the level of need is in their community. Any community based initiatives will have a better chance of working than a government mandated solution.
13. This question does not apply as I only have one opponent but I believe this is a fair question and would like to answer. My opponent and I differ on two main topics. He is a career politician bent on getting higher office, while that is not bad. The problem comes in when all of the decisions that he makes for the city will be based on his career and not on what is best for the city. I am not a politician and have no plans on becoming one. I believe that the mayor should be focused on the job at hand and not trying to build someone's resume for higher office.
14. While I am not a veteran candidate, I have deep ties to the community; I have been a seven year volunteer to the Redmond Police Department, a four year volunteer to the Duvall Police "Citizens on Patrol" program and a two year volunteer to the Duvall WRECK Teen center.

I will always maintain high ethical standards and will always strive to practice what I preach. I also plan to run a positive issue based campaign, not a negative based campaign.
